

CONFERR

presents

2-day Intensive workshop

Professor Allan Schore

The Repair of the Self:
psychotherapy for the 21st century

- Right brain-to-right brain transaction in the psychotherapeutic alliance
- Bodily-based transference and countertransference communications
- Interactive affect regulation as a basic mechanism of therapeutic change
- New insights into personality disorder and borderline state
- Origin of pathological dissociation and projective identification
- Aetiology and effective psychotherapeutic approaches
- Therapeutic empathy

September 9th and 10th 2005
London

Introduction

This is a unique opportunity to work closely with the world's leading authority on neuro-psychoanalysis. The focus of this 2-day intensive is the rapidly developing field of affective neuroscience and developmental psychology as it is applied to the practice of psychotherapy.

Dr Allan Schore is on the clinical faculty of the Department of Psychiatry and Biobehavioral Sciences, University of California at Los Angeles David Geffen School of Medicine. He is author of the seminal volume *Affect Regulation and the Origin of the Self* and two recent books, *Affect Dysregulation and Disorders of the Self* and *Affect Regulation and the Repair of the Self*. His groundbreaking contributions have impacted the fields of psychotherapy, psychoanalysis, affective neuroscience, neuropsychiatry, developmental psychopathology, trauma theory, and infant mental health. He is on the editorial staff and reviewer of 22 journals, is involved in psychiatric neuroimaging research, lectures internationally to a variety of clinical and scientific audiences, and has practiced psychotherapy for four decades.

Some advance reading of Professor Schore's work is recommended for those attending this workshop.

Programme

Day 1

Friday 9th September

Morning 10.0-13.0

Attachment, Intersubjectivity, and Affect Regulation

- Recent interdisciplinary data on the neurobiology of attachment, intersubjectivity, and affect regulation
- Early development of the right brain implicit self
- Advances in Regulation Theory
- Models of early relational trauma, the origins of pathological dissociation
- Aetiology of severe personality disorders

Afternoon 14.0-17.0

Clinical applications of Intersubjective Neurobiology

- Implications of recent neuroscience for psychotherapists
- Why the right hemisphere is dominant in clinical work
- Clinical applications of intersubjective neurobiology
- Implicit communications within the therapeutic alliance

Day 2

Saturday 10th September

Morning 10.0-13.0

Transference-Countertransference Communications

- Empathy and Projective Identification
- Clinical applications of intersubjective neurobiology
- Central role of bodily-based transference-countertransference communications, empathy, projective identification, and interactive affect regulation

Afternoon 14.0-17.0

Advances in Regulation Theory

- Changes in brain/mind/body in effective psychotherapeutic treatment
